

Covid-19 Vaccination Policy:

Ski for Life is one of many community events being heavily impacted by current restrictions and supply chains as we move closer to our 2022 event. Our committee continues to address and consider all the changes and challenges presented, many of which are out of our control with the intent to hold a safe and memorable 2022 event.

With careful consideration to our Ski for Life Family, the communities we interact with along the way and in consultation with SA Health guidelines, this year's event will require all participants to be double vaccinated against Covid 19.

We would ask all team captains to collect verification of vaccination from their team members prior to the event and submit to Tom (info@skiforlife.com.au), unless a medical exemption can be supplied. This can be photos/screenshots of each participant certificates that clearly show the participants name and vaccination status. Participants under the age of 16 will not be required to be vaccinated. Note that for anyone not yet registered, proof of vaccination is now a requirement of entry on the website.

In the event of registered participants not being able to meet this requirement and as a result unable to attend, a full refund will be made.

As you can understand, this collection process involves a large amount of data entry and your prompt action on sending these through is greatly appreciated by all. We thank you for your understanding and appreciate your attention to this well in advance to avoid any complications.

Mark Facey, Ski for Life Chairperson.
